**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. **Claims 13 and 15-25 are rejected under 35 U.S.C. 103(a) as obvious over**

**Pennsylvania Department of Environmental Protection "Coal Mine Drainage Prediction and Pollution Prevention in Pennsylvania" in view of Crundwell US 2005/0211019 A1.**

3. The department teaches a method of simulating a process in which ore, in a heap, is microbiologically leached, the method including the steps of microbiologically leaching material, representative of the ore, in a housing defining an enclosed, confined volume, monitoring the temperature of the material, inside the volume, at each of a plurality of locations. (Figure 7.12).
4. The primary reference does not expressly teach controlling the heat loss from the confined volume effectively to zero.
5. Crundwell teaches that microbial heat leach systems have a take-off temperature where the reaction becomes auto-thermal (Paragraph [0139]). Therefore, at the time of invention it would be obvious to one of ordinary skill in the art to perform the process of heap leach simulation of the primary reference, including the step of controlling the heat loss from the confined volume effectively to zero, in view of the teaching of Crundwell. The suggestion or motivation for doing so would have been to mimic the auto-thermal phenomenon of heap leaching. This rationale is supported by exemplary rationale (b) in section 2143 of the MPEP,

“simple substitution of one known element for another to obtain predictable results.” See MPEP §2143.

***Response to Arguments***

Applicant's arguments with respect to claims 13 and 15-25 have been considered but are moot in view of the new ground(s) of rejection.
